Using solar energy is a best replacement for electrical energy which is difficult to be accessed in village areas. And also it is cost effective, scalabe, long lasting charge.

Take turns sharing your ideas while clustering similar or related notes as you go.

In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you and break it up into smaller sub-groups.

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

> Using traditional pesticide spraying method which can be deployed as one part

> > can pave way to

Traditional spraying of pesticides are utilized so that they can be sprayed to all the crops in uniform pattern thereby enhancing protection

Drone mechanisms can be applied for aerial supervision

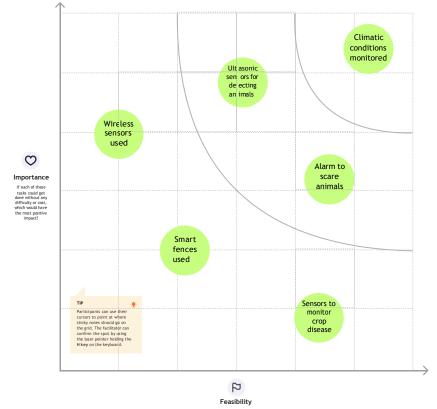

Solar energy can be harnessed to operate our prototype so that i conventionalization

prefered in this project mainly for their easy medium. Using flying mechanisms , drones can be taken to fly through the crops with high scale of detection for pests

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

⊕ 20 minutes

Regardless of their importance, which tasks are more

feasible than others? (Cost, time, effort, complexity, etc.)
